CONFIDENTIAL

VPN (to connect to the servers)

- Download *Open VPN* client from <https://openvpn.net/client-connect-vpn-for-windows/>
- Once the Program is installed, click on File and import the *.ovpn* file sent to you.

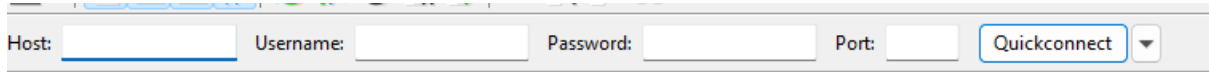

- Once profile is imported, click *Connect* to connect to the VPN

The program will save the profile. You do not need to import it every time you need to connect to the VPN.

FTP Access

Download FTP Client from <https://filezilla-project.org/download.php?platform=win64>

To connect, just enter the below details in the top section.

A screenshot of the top section of an FTP client interface. It shows four input fields: 'Host:', 'Username:', 'Password:', and 'Port:'. To the right of the 'Port:' field is a 'Quickconnect' button with a dropdown arrow.

Host: 185.76.246.88

Port: 21

Username and Password will be sent separately.
